J02 2022年12月第一套 参考答案（新东方整理版）

2022年12月 英语六级答案 （第一套）

Part I Writing

参考范文:

The Use of Information Technology in Education

With the application of information technology in education,college students can now learn in more diverse and efficient ways.Advances in technology have literally transformed the way in which students learn and study.

In the first place,information technology has enabled the use of audio and video materials as teaching aids, which can enhance students'understanding of the subject. Furthermore, the databases and libraries are available at an affordable price,allowing learners to access a wide range of educational resources.In addition to the diversified materials,online resources provide students with instant access to a variety of information about any subject.Gone are the days when students spent long days studying in the library for a research paper.Now,the availability of e-books and past examination papers is now just a few clicks away.These materials can all be used to supplement lessons taken in the classroom efficiently.

As a result of the integration of information technology into education,learning process has been made more efficient,effective and diverse.Thus,college students should be proactive in adapting to the various learning styles and make use of them effectively.

Part II Listening Comprehension

1.A 2.B 3.A 4.D 5.C 6.C 7.D 8.B 9.B 10.A 11.C 12.D 13.C 14.B 15.A

16.D 17.A 18.B 19.C 20.A 21.B 22.B 23.C 24.C 25.D

Part III Reading Comprehension

26.F 27.A 28.E 29.K 30.G 31.N 32.B 33.C 34.I 35.O

36.E 37.I 38.D 39.A 40.F 41.K 42.H 43.I 44.C 45.G

46.A 47.B 48.B 49.A 50.D 51.B 52.C 53.A 54.C 55.D

Part IV Translation

参考译文:

The Qinghai-Tibet Plateau is situated in the southwest of China, covering an area of about 2.3 million square kilometers,with an average altitude of over 4,000 meters.It is known as the “ Roof of the World ”. The Qinghai-Tibet Plateau is abundant in natural resources,boasts beautiful scenery and has a variety of rare wild animals.

The low temperature of the plateau has created a large area of alpine glaciers.It is the source of many famous rivers in Asia and is the main source of fresh water supply in China and Southeast Asia. The Qinghai-Tibet Plateau is vital to the global ecosystem.

Glaciers on the Qinghai-Tibet Plateau are melting at an accelerated rate due to climate change.China has been committed to protecting the ecosystem of the Qinghai-Tibet Plateau,with increasing grassland coverage and more effective protection of many endangered species.
